Dear Mr. BenAmoz,

I am writing to express my sincere gratitude for your invitation to join the Jewish Hope initiative advisory board. I am honored to accept the opportunity to contribute to this important cause.

As a Converso descendant of Jewish ancestry, I have a deep personal connection to this initiative. I am aware that there are millions of Jewish descendants in Brazil, with the highest concentration in the Pernambuco state region, where I am based. This region is home to the first synagogue in the Americas and is rich in Jewish history. I am committed to working with your team to reach out to the Converso and associated Jewish communities in Pernambuco to establish strong regional support.

In my role as administrator and organizer of the Peixe Rosa Medical CRO, which is supported by the Brazilian government and involves 52 nationwide teaching hospitals, labs and universities, I would like to offer our infrastructure to facilitate ancestry testing for Converso descendants. I believe that starting this effort on a regional scale and focusing on Pernambuco and its over 9 million inhabitants would be an effective approach toward ultimately making this a nationwide offering.

I look forward to collaborating with you and the parties you are organizing in Israel and the United States to ensure a comprehensive outreach program that extends beyond ancestry testing to include education for the newly found decedents and building ties with the broad support of Israel and the Jewish culture globally.

Sincerely,

Joseph R. Miller Molina
